- EnterpriseOne™ and World™ Software- SmartCommerce integrates with both EnterpriseOne™ (formerly OneWorld) and World™ Software version A7.3 thus leveraging your investment in either JD Edwards ERP technology.
Business to Business (B2B) and Business to Consumer (B2C) Support- SmartCommerce provides the capabilities to support both B2C commerce as well as B2B commerce utilizing a common eCommerce foundation.
Superior Value and Return-on-Investment (ROI)- Unlike other very costly eCommerce solutions for JD Edwards, SmartCommerce can be licensed and deployed very cost-effectively on a fixed-time and fixed-fee basis resulting in a very fast return on your e-commerce investment.
Rapid Deployment in Under 30 Days- With SmartCommerce, your eCommerce website can be enabled with our technology in under 30 days.
Flexible, Easy Integration with Your Current Website or New Website- SmartCommerce can be integrated with your organization's current website product catalog and content using our SmartCommerce connectors or can be used with the SmartCommerce Enterprise Product Catalog leveraging a shared repository of product information with your JD Edwards ERP solution.

Comprehensive Implementation Support- At Premier, we assist our customers with all aspects of their JD Edwards implementation requirements. Whether your organization's requirements include setting up the JD Edwards environment, training the project team, developing custom programs or overall project management, we can assist your organization meet its implementation objectives in a timely fashion and within budget.

Rapidly, Economically and Predictably- Our five step Express methodology for JD Edwards software implementation ensures that:

- Project scope and objectives are well defined
- Resource requirements, assumptions and risks are understood at the onset of the project
- Specific needs of your organization are understood and accounted for in the development of the solution.

Enterprise Structure Design- Premier's consultants can facilitate the design of your organization's financial infrastructure (chart of accounts, financial reporting requirements, and management reporting) in a way that not only takes full advantage of the JD Edwards software but improves the information flow across all areas of your organization.

Technical Consulting- Premier's consultants can assist your organization with all aspects of EnterpriseOne™ Toolset development to support complete development of application modules not provided by JD Edwards, enhancements to EnterpriseOne™, data conversion, interfaces and reporting.

Complete Project Management- Utilizing a full set of automated tools for process and project management, communications, status reporting and issue resolution, we can take all the guesswork out of managing complex information technology projects. This allows your organization to focus on key areas that bring the most value to projects of this nature – understanding of the business, its requirements, and how to best utilize the new JD Edwards software.

Experience- All Premier consultants are JD Edwards-trained and possess significant experience implementing JD Edwards software. Through their detailed knowledge of the application software, our consultants can provide the required insight to properly design and configure the highly-flexible JD Edwards software solution to address your organization's business requirements. Additionally, the large majority of our consultants are proficient in both English and Spanish.

Helping our clients achieve their goals and realize the associated benefits of new information technology is our number one objective.
