## Create!form®

*It's time to re-form your business.®*

## Your PeopleSoft Output.

*It's more than just paper. To your customers and partners it is the face of your business. Now more than ever your output demands extend far beyond print. Today you also need to be able to communicate efficiently by email, fax, and the web.*

*Create!form's PeopleSoft® certified products extend the power of your PeopleSoft EnterpriseOne® and World™ systems by providing efficient and cost-effective, e-enabled solutions for document formatting, management and delivery, giving you the opportunity to...*

## Look Good.

With Create!form, better looking, more functional business documents are yours without extensive application or RDA changes. Design basic form overlays or completely reformat your documents to get the look you want and increase the usability of your documents. Create!form software allows you to easily add logos, graphics, bar codes, signatures, color, fonts, MICR for check/cheque printing, and more to create professional, customized output from your PeopleSoft Enterprise, EnterpriseOne (formerly J.D. Edwards ERP 8.0 and OneWorld Xe), and World applications. When you're ready, you can preview the merge of your form and data on-screen prior to production. With an intuitive graphical design interface, anyone in your organization, even non-technical people can design forms, saving time and valuable IT resources.

## Work Less.

Installing Create!form makes your entire PeopleSoft roll-out go faster. Create!form integrates directly with the native output that your systems generate—PDF for EnterpriseOne, ERP 8.0, and OneWorld Xe, and text for World and Enterprise—so you don't need to make major application or RDA changes to get the output you need. Since we isolate the output formatting from your business processes, overall implementation effort is drastically reduced. You can be up and running with usable output in a few days instead of a few weeks.

The benefits don't stop at installation. We've been developing electronic forms technology since 1987, so we have the experience to make the complex simple and reliable. That means Create!form servers just keep running and running, while our industry leading design tool allows even non-technical users to create and update document designs quickly and easily.

With Create!form you get quick and easy installation, reliable operation, and the freedom to change your output any time you want without an army of programmers or consultants. All of which adds up to less work for you and a low total cost of ownership.

## Save Money.

Create!form solutions let you eliminate the expense and inefficiency of pre-printed forms. Changes to your output can be made in minutes, electronically, and implemented immediately—all on plain paper. No more storing cartons of pre-printed materials. An end to bursting tractor fed stock. Nothing wasted due to obsolescence.

The savings don't stop there. Eliminate printing and mailing entirely using Create!form's powerful output modules for automated email and fax delivery. Reduce document storage, retrieval, and reproduction costs with Create!archive®, our digital archiving and self-service document retrieval system.

Add logos and graphics that can be scaled and rotated.

Turn existing output into this

Over 1,200 PeopleSoft

Create!form systems are easily scalable. A modular design allows you to buy only what you need to provide flexibility in managing your mission and business critical PeopleSoft output.

## Be Connected.

E-enable your business communications by adding the power of automated fax, email, and archive to your output processes. With the Create!form e-delivery and archiving products, you can copy, split, and distribute your output files into individual documents, and deliver them in the most efficient way. Send documents to any printer on your network, or deliver them electronically using fax and email—all without user intervention. Create!form's conditional processing capabilities select what's needed based on the rules you define.

Create!archive automatically indexes and archives exact copies of your output documents to hard disk, eliminating the need for printing and storing paper copies. The documents can be retrieved and viewed from within any Windows client, even from inside PeopleSoft applications. For fast, self-service document retrieval, the Create!archive web interface allows stored documents to be viewed using any internet browser. Staff and customers are provided with instant and secure on-line access to documents.

Variable data can be printed in any size, using any font and color.

Thousands of PostScript® compatible fonts give you total creative control.

The same variable can be shown in several places, even in different fonts.

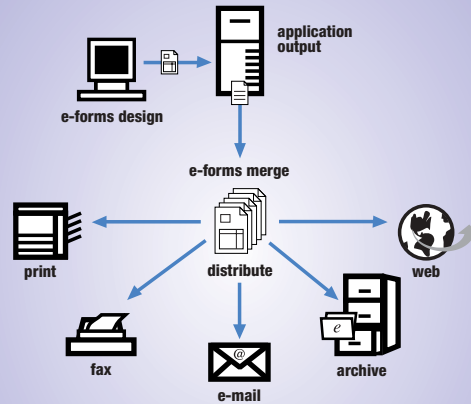

Print text and graphics at the maximum resolution of your printer.

Supports both highlight and full-color printing.

The same variable can be shown in several places, even in different fonts.

Variable data can be easily translated to bar codes, and MICR for check/cheque printing.

## how it works

Create!form allows you to merge your PeopleSoft reports with custom e-forms designed in a Windows environment. Your merged output is then automatically routed and distributed to any network printer, delivered electronically via fax and email and/or digitally archived.

## Integrate Completely.

Create!form is the only e-forms solutions that works directly with the native PeopleSoft PDF format, integrating completely into EnterpriseOne, ERP 8.0 and OneWorld Xe's workflow system. That means important PeopleSoft features like your drill down links remain fully functional. Now you can improve your company's document formatting and delivery capabilities without any disruption to your PeopleSoft processes.

Create!form's plug-in for Adobe Acrobat® allows you to view on-line PeopleSoft PDF reports with the custom formats that you have defined. More than just a print preview, this means that every time you view a PeopleSoft report, you see exactly the same output that is sent to your customer, partner, or supplier.

## Relax. We're Certified.

Create!form is a member of the PeopleSoft Partner Connection Certified Partner Program, and is certified on both PeopleSoft EnterpriseOne and World. Our software is always tested with the latest PeopleSoft releases, so you can implement with confidence.

## What Create!form Users Say

"I can honestly say that Create!form has given us the best return of any product I have ever bought."

—John O'Hara,  
IT Manager,  
Simon Jersey

"With Create!form we can lookup invoices and packing slips on-screen while talking to a customer. That's something you just can't throw a price on."

—Marco Del Monte  
Senior Application  
Manager,  
Deeley  
Harley-Davidson  
Canada

"E-forms have enhanced our level of customer service by enabling us to modify our statements in response to customer requests in just a few minutes or hours, rather than having to work with outside print vendors that can take days or weeks."

—Scott Granfield,  
Sr. Project  
Manager,  
Mizuno USA

clients worldwide

## About Create!form

---

*A J.D. Edwards Alliance Partner for over 13 years, Create!form became a PeopleSoft Partner Connection Certified Software Partner for output management in 2003. Create!form is dedicated to providing PeopleSoft users with industry leading e-forms and output management solutions that enhance the functionality of PeopleSoft Enterprise, EnterpriseOne, and World implementations.*

*Create!form's worldwide offices and extensive partner network support over 4,000 customers in more than 50 countries, and service a variety of markets including manufacturing, distribution, construction, finance, insurance, healthcare, public sector, real estate, and education.*

*With offices around the globe, our support team is available where and when you need them. Support services include installation, technical support, forms design and maintenance, training classes, and customized on-site training. Whether you need a little or a lot of support, we're there for you. When you factor in our ease of implementation, training, and operations support, Create!form offers both the lowest total cost of ownership and the highest quality output.*
